

# KENWOOD

## NX-240V16P/NX-340U16P ProTalk® DIGITAL

### Operating Manual

#### ▼ FCC License Information

Your **KENWOOD** transceiver operates on communications frequencies which are subject to FCC (Federal Communications Commission) Rules & Regulations. FCC Rules require that all operators using Private Land Mobile radio frequencies obtain a radio license before operating their equipment. Application for license must be made on FCC form 601, schedules D and H, and Remittance form 159.

**FAX:** Forms can be obtained by fax from the FCC Fax-On-Demand system. Call 1-202-418-0177 from your fax machine and request document number 000601 for the form, schedules, and instructions.

**MAIL:** Forms can be ordered by telephone, and will be sent to you by first class mail. Call the FCC Forms Hotline at 1-800-418-FORM (1-800-418-3676).

**INTERNET:** Form 601 and instructions can be downloaded from the FCC Forms website at <http://www.fcc.gov/formpage.html>

Before filling out your Form 601 application Technical Data section, you must decide on which frequencies you will operate. See the frequency tables below.

**QUESTIONS?** Call the FCC for license application questions at 1-888-CALL-FCC (1-888-225-5322).

#### ▼ CHANNEL SETUP MODE

This transceiver allows you to reprogram each of the channels with different frequencies and QT (Quiet Talk)/DOT (Digital Quiet Talk)/RAN (Radio Access Number) settings. The table below lists the default channel settings for Analog and Digital modes. The transceiver comes in ANALOG MODE for both zones.

##### ▼ NX-240V16P

ANALOG MODE				DIGITAL MODE					
Zone Type	Channel Number	Table Number	Frequency (MHz)	QT (Hz)	Zone Type	Channel Number	Table Number	Frequency (MHz)	RAN
Analog	1	(1)	151.6250	67.0	Digital (NXDN)	1	(1)	151.6250	1
	2	(1)	151.6250	77.0		2	(1)	151.6250	2

#### ▼ SELF PROGRAMMING MODE

##### TO CHANGE THE OPERATING FREQUENCIES OF CHANNELS

- With the transceiver power OFF, press and hold the **PTT** switch and **Side 1** key while turning the transceiver power ON.

Continue to hold the **PTT** switch and Side 1 key until the LED lights **orange** and the transceiver announces "Self."

##### Zone Selection

Choose a **Zone** by side keys

##### Mode Selection

Choose **Analog** or **Digital** by side keys

##### Channel Selection

Select a channel to be set up.

Channel Table  
• QT/DOT/RAN  
• NXDN (Digital) ID

##### [2] Release the PTT switch and Side 1 key.

- The transceiver announces "Zone #" that you were operating.
- Pressing the Side 1 key or Side 2 key will toggle between Zone 1 and Zone 2.
- Press the **PTT** switch to choose the Zone that you want to modify.

Then, the transceiver announces "Analog" or "Digital" whichever the selected zone was operating.

- Pressing the Side 1 key or Side 2 key will toggle between "Analog" and "Digital."
- Press the **PTT** switch to choose the mode that you want to operate in the selected zone.

- Upon choosing the mode (above [2]), the transceiver announces Zone#, Channel#, and "Channel."

##### [3] Rotate the Channel selector to your desired channel#.

To change the frequency of the selected channel, Press the **PTT** switch.

To change the QT or DOT, press the Side 1 or 2 key to toggle between "Channel", "QT", and "DOT". [If the channels is in ANALOG Zone] and press the **PTT**.

To change the RAN or NXDN ID, press the Side 1 or 2 to toggle between "Channel", "RAN", and "NXDN ID". [If the channels is in DIGITAL Zone] and press the **PTT**.

##### [4] Press the Side 1 / Side 2 key to increment/decrement the table number.

To select a frequency, QT/DOT/RAN, and NXDN ID.

- Press and hold the Side 1 or Side 2 key to increment / decrement the number by 5 at a time.

##### [5] Press the PTT switch to save the setting.

- A beep will sound.
- Repeat steps [3] to [5] to set up another channel.

##### [6] Turn the transceiver power OFF and then ON again to activate the new settings.

**Note:** The transceiver will automatically return to normal operation if no action is performed for 20 seconds.

**VHF Frequency Selection Table**

Channel Setup Number	Frequency (MHz)	Channel Setup Number	Frequency (MHz)	Channel Setup Number	Frequency (MHz)	Channel Setup Number	Frequency (MHz)

**\*NXDN ID (Blank or 1 to 65519)**

NXDN ID (Own unit ID) allows you to configure an identification code consisting of a number from 1 to 65,519 for each transceiver. It can be used to identify the transceiver in an NXDN System (Conventional).

### ▼ CHANNEL CONFIRMATION MODE

To confirm your channel settings:

- [1] With the transceiver power OFF, press and hold the PTT switch while turning the transceiver power ON.
  - Continue to hold the PTT switch until the LED lights orange and the transceiver announces "Confirm".

- [2] Release the PTT switch.
  - Transceiver announces "Zone 1 Analog (or Digital)".

- [3] Pressing the Side 1 key or Side 2 key will toggle between "Zone 1" and "Zone 2". Select a zone by pressing the PTT switch.

- [4] Rotate the Channel selector to your desired channel.
  - Transceiver announces the channel table number, tone number, scrambler and VOX settings of the selected channel.

- [5] Turn the transceiver power OFF and then ON again to return to normal operation.

**Note: The transceiver will automatically return to normal operation if no action is performed for 20 seconds.**

### ▼ VOX GAIN LEVEL SETUP MODE

To change the VOX Gain level:

- [1] With the transceiver power OFF, press and hold the Side 1 key while turning the transceiver power ON.
  - Continue to hold the Side 1 key until the LED lights orange and the transceiver beeps.

- [2] Release the Side 1 key.
  - Transceiver announces the current VOX Gain Level (OFF, 1~10).
    - OFF: a double beep
    - 1: the least sensitive
    - 10: the most sensitive

- [3] Press the Side 1 key. Increment VOX gain level by 1. (this will adjust the VOX gain level of the radio)

- Press the Side 2 key. Turn VOX ON (a single beep)/OFF (a double beep). (this will change the ON/OFF setting for the current channel of the current zone)
  - To change channel: Rotate the Channel selector
  - To change zone: Hold the Side 2 key

Press the PTT switch: Confirm the VOX Gain Level.

- [4] Turn the transceiver power OFF and then ON again to return to normal operation.

**Note: The transceiver will automatically return to normal operation if no action is performed for 20 seconds.**

### ▼ KEY ASSIGNMENT MODE

This transceiver allows you to reprogram the Side 1 and 2 keys with any of the functions listed in the table below. Each key can be configured to have two functions by a **Press** and a **Hold**. (some features cannot be assigned as a Press or a Hold function).

Table Number	Function Name	Descriptions	Side 1 Key Press	Side 1 Key Hold	Side 2 Key Press	Side 2 Key Hold
(00)	None	No Function	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
(01)	Calling Alert	Transmits a Calling Alert Tone upon a press of the Calling Alert key. This function cannot be assigned as a Hold function. If Calling Alert is selected from the Press or dropdown list, None will automatically be configured in the Hold dropdown list, and this configuration cannot be changed.	<input type="radio"/>	-	<input type="radio"/>	-
(02)	CW Message	Sends the configured CW Message. This function can be configured if a message is configured for CW Message in the CW ID window.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
(03)	Key Lock	Toggles the Key Lock between enabled and disabled. While Key Lock is enabled, key functions will be disabled. Turning the transceiver OFF and ON again will disable the Key Lock, and key functions can be used.  Following are keys that are enabled even if the Key Lock is enabled: • PTT switch • Key Lock • Key Lock with Status Memory • Super Lock • Squelch Off • Squelch Off Momentary • Monitor • Monitor Momentary • Selector	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
(04)	Key Lock with Status Memory	The Same function as the key lock, however, turning the transceiver OFF and ON again will NOT disable the Key Lock, and keys remain locked.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
(05)	Monitor	Toggles the Monitor between enabled and disabled. While Monitor is disabled, the transceiver allows a carrier to open the squelch regardless of configuration for signaling.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
(06)	Monitor Momentary	While this key is pressed and held, the transceiver is disabled from monitoring the configured signaling and the squelch is opened upon detection of a carrier. This function cannot be assigned as a Hold function. If "Monitor Momentary" is selected from the Press dropdown list, None will automatically be configured in the Hold dropdown list, and this configuration cannot be changed.	<input type="radio"/>	-	<input type="radio"/>	-
(07)	Scan	Switches the Scan On or Off.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
(08)	Scan Temporary Delete	Temporarily deletes a channel added to the scanning sequence from the sequence. If a channel for which Scan Add is enabled is selected and if a Scan Temporary Delete key is pressed while scan pauses, the channel will be deleted from the scanning sequence. Status of channel deleted from the scanning sequence by this function cannot be retained in the transceiver. Reactivating the scan by pressing the Scan key returns the transceiver to the original state.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

(09)	Scrambler/Encryption	Enables or disables the Scrambler/Encryption.	○	○	○	○	○
(10)	Squench Off	Toggles the Squench Off between enabled and disabled.	○	○	○	○	○
(11)	Squench Off Momentary	While this key is pressed and held, the squench is open and the transceiver unmutes the speaker. This function cannot be assigned as a Hold function. If "Squench Off Momentary" is selected from the Press dropdown list, "None" will automatically be configured in the Hold dropdown list, and this configuration cannot be changed.	○	-	○	-	○
(12)	Super Lock	Pressing and holding the key for 4 sec activates the Super Lock function. Super Lock is the function to prevent accidental operation of the transceiver. Even if the transceiver is turned OFF and ON again, the Super Lock status will be retained. To deactivate Super Lock, turn OFF the transceiver, and press and hold the Side 2 key while turning ON the transceiver. Once an LED lights orange, release the Side 2 key within 2 sec. This function cannot be assigned as a Press function. If "Super Lock" is selected from the Hold dropdown list, None will automatically be configured in the Press dropdown list, and 4.0 s will automatically be configured in the Hold Delay exit box, and these configurations cannot be changed. Following keys can still be used while Super Lock mode is On: • PTT switch • Squench Off • Squench Off Momentary • Monitor • Monitor Momentary	-	○	-	○	○
(13)	Low Transmit Power	Toggles the Transmit Power of the transceiver between High and Low.	○	○	○	○	○
(14)	RX/TX Frequency Scan	Switches the RX/TX Frequency Scan On or Off for a channel with Repeater mode enabled and RX/TX Frequency Scan enabled.	○	○	○	○	○
(15)	Zone Down	Decreases the Zone number in steps of 1.	○	○	○	○	○
(16)	Zone Up	Increases the Zone number in steps of 1.	○	○	○	○	○

To change the functions of the **Side 1** and **Side 2** keys:

**[1]** With the transceiver power OFF, press and hold the **Side 1** and **Side 2** keys while turning the transceiver power ON.  
 • Continue to hold the **Side 1** and **Side 2** keys until the LED lights orange and the transceiver announces "Setup".

**[2]** Release the keys, and the transceiver will announce "Table Zero".

**[3]** Press the **Side 1** or **Side 2** to increment / decrement the table number and press the **PTT** Switch to select the function that you want to assign to a key (either the **Side 1** or the **Side 2**, a press or a hold).

**[4]**  
 • Press the **Side 1** key to assign the function selected in the above **[3]** to the **Side 1** key press.  
 • Hold the **Side 1** key to assign the function to the **Side 1** key hold.  
 • Press the **Side 2** key to assign the function to the **Side 2** key press.  
 • Hold the **Side 2** key to assign the function to the **Side 2** key hold.

**[5]** Beeps will sound at the completion of **[4]** key assignment.  
 You will need to repeat **[3]** and **[4]** to assign more functions to press/hold key.

**[6]** Turn the transceiver power OFF and then ON again to activate the new settings.

**Note: The transceiver will automatically return to normal operation if no action is performed for 20 seconds.**

### ▶ ALL RESET MODE

At some point in time, you may desire to reset the transceiver settings to their default values. This function will reset all channels to their default analog frequencies and QT/DQT, the VOX function to its default status, and all keys to their default functions.

To reset the transceiver:

**[1]** With the transceiver power OFF, press and hold the **PTT** switch, the **Side 1** key, and the **Side 2** key while turning the transceiver power ON.  
 • Continue to hold the keys for 2 seconds, until the LED lights orange.

**[2]** Release the keys.

• The keys must be released **within 1 second** after the LED lights orange, otherwise All Reset Mode will cancel.  
 • The transceiver announces "Confirm" and returns to normal operation in the default settings.
