

F3400/F7010 Series: Programming Custom Text

These radios give you the ability to substitute custom text for Menu text or key names. This can be used to customize text with different languages. The examples below show Spanish text substitutions.

1. In the cloning software, go to User Interface > Key Assign > Display.
2. Change **Language Select** to **Other**.

3. Go to **Display Message > Key Guide**.
4. Rename desired keys or Display messages.

The example to the right shows a Display with custom text.
